Summary

Backend and automation engineer with 3+ years of experience building Python backends, API integrations, and cloud workflows. Recent work includes solo end-to-end delivery of insurance and finance workflow platforms on Zoho Catalyst, with one application now processing ~\$250K/year in premium revenue. Comfortable owning systems from form to webhook to database, and shipping under tight timelines.

Experience

Senior Software Developer

AutomateAccounts

*Remote, India
Sep 2025 – Present*

- Solo developer for client-facing automation platforms on **Zoho Catalyst**, **CRM**, **WorkDrive**, **Flow**, and **Azure**, delivering end-to-end systems for a North American insurance brokerage.
- Rebuilt a critical **Errors & Omissions insurance application** end-to-end in 3 weeks (Python + vanilla JS/HTML/CSS + Zoho Catalyst); the new system now processes ~\$250K/year in premium revenue, replacing an unstable legacy app that frequently failed mid-workflow.
- Built a multi-tenant **Certificate of Insurance** generation platform with per-customer templates, version control, and bulk export; migrated the database layer from Zoho Catalyst NoSQL to MongoDB during a US-to-Canada data center migration.
- Designed webhook-driven and scheduled-job systems using **Zoho Catalyst Functions**, **DataStore triggers**, **MongoDB**, and third-party APIs (payment gateways, Apollo, LinkedIn).
- Shipped 10+ production systems including invoicing, document processing pipelines, lead notifications, territory automation, and CRM data migrations between data centers.
- Set up **Azure Virtual Desktop** environments for ARS and PowerBroker, including a **500GB+** data migration via Azure Blob Storage with zero data loss.

Software Engineer

Tata Consultancy Services

*Hyderabad, India
Jun 2023 – Aug 2025*

- Co-built a full-stack cloud resource management system using **Python**, **Flask**, **Docker**, and Azure APIs, reducing deployment time by **80%**.
- Developed RESTful microservices in **FastAPI** with Swagger/OpenAPI documentation and secure API design, improving deployment workflows by **30%**.
- Built FinOps automation pipelines using **AWS Lambda**, **S3**, and **Athena** for ETL and reporting, supporting cost-visibility decisions across AWS and Azure.
- Contributed to VM right-sizing and storage optimization automation that helped surface multi-million-dollar cloud cost savings opportunities for the team.
- Led a data migration to centralize Azure network IP data behind secure REST APIs, improving accessibility and reliability for downstream teams.
- Prototyped an AI-powered CI/CD assistant integrating OpenAI APIs with Azure DevOps and Docker for automated containerized deployments.
- Worked in Agile teams with Git-based version control, code reviews, and unit-tested production deliveries.

Projects

VisaPro V1 & V2

github.com/visapro.git 

- Designed and developed a full-stack **visa processing platform** enabling international travelers to retrieve dynamic visa requirements and assess eligibility based on country, age, and travel purpose.
- Built a modular backend in **FastAPI (Python)** with a **React.js** frontend, structured for extensibility

(multi-language support, third-party integrations).

- Integrated an **AI-driven assistant** powered by OpenAI APIs for real-time, context-aware responses to traveler queries.
- Implemented user authentication, secure session management, and CRUD operations on SQLite.
- **Tech Stack:** React.js, FastAPI, REST APIs, SQLite, OpenAI API, JWT.

Computer Vision-based Crime Detection System (Published Research)

- Built a deep-learning video surveillance system to detect criminal activity in real time using a **CNN-LSTM architecture** with frame-wise activity classification.
- Trained on the **UCF-50 dataset** with augmentation and preprocessing for improved generalization on violent-activity detection.
- Designed a real-time inference pipeline using **OpenCV** and **Keras/TensorFlow** to flag suspicious behavior and trigger alerts.

Skills

- Languages: *Python (advanced), JavaScript, SQL, HTML5/CSS3.*
- Backend: *Flask, FastAPI, Django, REST APIs, Webhook architectures, Microservices.*
- Platforms: *Zoho Catalyst (Functions, DataStore, AppSail), Zoho CRM / Flow / WorkDrive / Books APIs.*
- Cloud: *Microsoft Azure (AVD, VMs, Blob Storage, DevOps), AWS (Lambda, S3, Athena).*
- Databases: *MongoDB, PostgreSQL, MySQL, NoSQL data modeling.*
- Frontend: *Vanilla JS, React.js.*
- Tooling: *Git, Docker, Azure DevOps, CI/CD, Jira, Agile.*
- Integrations: *Payment gateways, OpenAI APIs, Apollo, LinkedIn, OAuth flows.*

Education

GITAM University – *B.Tech, Computer Science Engineering*

June 2019 – April 2023

- GPA: 9.0/10

Certifications

- Microsoft Certified: AI-900 Azure AI Fundamentals – *2024*
- Microsoft Certified: DP-900 Azure Data Fundamentals – *2023*
- Microsoft Certified: AZ-900 Azure Cloud Fundamentals – *2022*
- Google GenAI E0 Certification – *Sep 2023*
